To: CA Directory Customers

From: The CA Directory Product Team

Subject: Feature Deprecation Announcement regarding DXmanager UI and JXweb

CA Technologies is continually working to improve our software and services to best meet the needs of our customers. In order to provide the best user interface, we will continue to enhance the new Directory Manager Administrative UI that was initially introduced in 12.5 release. Therefore, DXmanager UI will not be included as part of future releases of CA Directory beyond 12.6.

While support for the DXmanager UI is part of the 12.6 release and prior releases, we encourage users to transition their day-to-day activities to the new Directory Manager Administrative UI.

We strive to enhance the Directory Manager UI to increase the functionality and usability of that interface. We would like to hear from you on recommendations to further enhance the new Directory Manager UI. Please submit your ideas to the Security community (<http://communities.ca.com>).

We are also announcing that the web-based LDAP browser JXweb will be removed as well in future releases of CA Directory beyond 12.6. Users are encouraged to install and use JXplorer as an alternative to JXweb.

If you have any questions regarding the support schedule, please contact CA Support at CA Support Online (<https://support.ca.com>), your local CA Account Manager, Customer Success Manager or CA Customer Care online at <http://www.ca.com/us/customer-care.aspx> where you can submit an online request using the Customer Care web form: <https://support.ca.com/irj/portal/anonymous/customercare>. You can also call CA Customer Care at +1-800-225-5224 in North America or see <http://www.ca.com/phone> for the local number in your country.

Your success is very important to us, and we look forward to continuing our successful partnership with you.
