CA Virtual Network Assurance r2.0
General Availability

CA Technologies is pleased to announce the availability of **CA Virtual Network Assurance r2.0.** This is the second major release of CA Virtual Network Assurance, which enables monitoring modern networks based on SDN/NFV (Software Defined Networking/Network Functions Virtualization) and hybrid cloud architectures. Together with **CA Performance Management r3.0.0** and **CA Spectrum r10.2.0**, customers have a comprehensive solution to extend experienced monitoring to use cases such as OpenStack networks, OpenDaylight networks, vCPE deployments, and now Cisco ACI data centers.
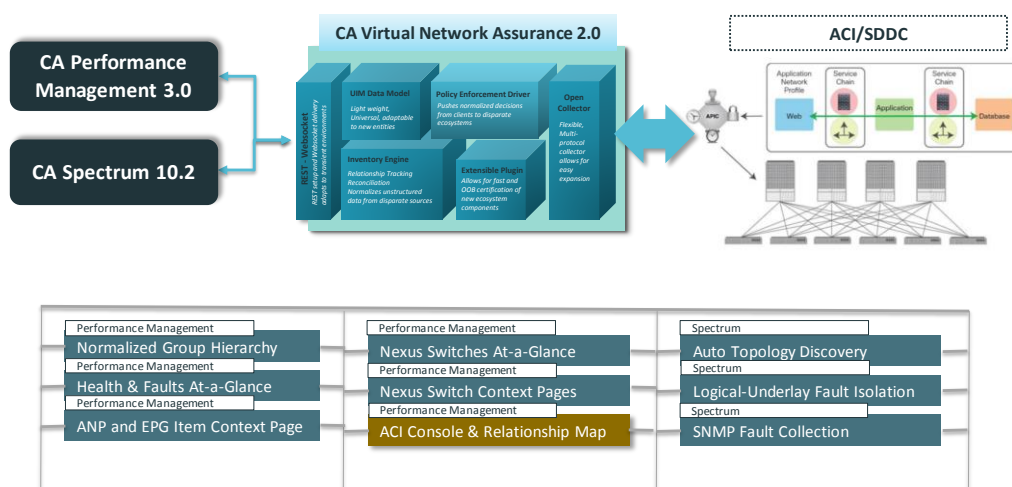

The goal of this release is to expand monitoring and visibility into the new Cisco ACI data centers. We also added support for Nuage in data centers and Network-as-a-Service. For a comprehensive look at the features in CA Virtual Network Assurance r2.0, please visit

Key features Video

https://youtu.be/vstIaItbDCc
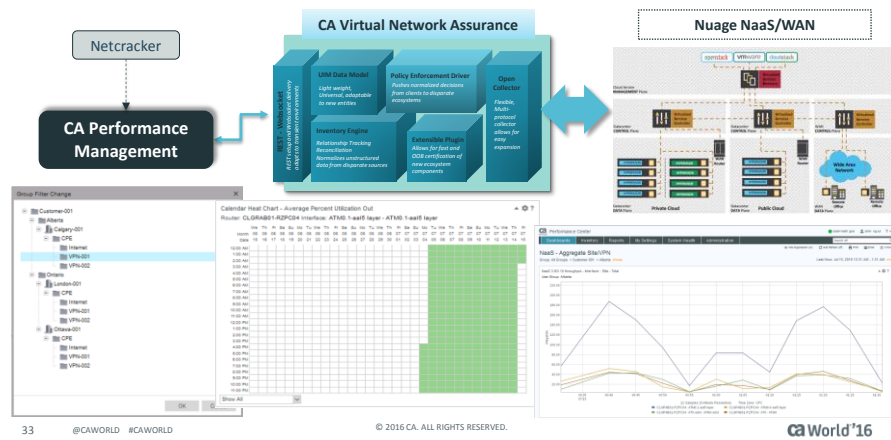

New Feature Highlight – Cisco ACI Monitoring

Together with CA Performance Management r3.0 and CA Spectrum r10.2, CA Virtual Network Assurance r2.0 solves the visibility gap for enterprises with Cisco ACI data center.

New Feature Highlight – Cisco ACI Monitoring

In addition to Cisco ACI, CA Virtual Network Assurance r2.0 can also monitor Wide Area Networks based on the Nokia Nuage Network-as-a-Service architecture
