Q&A Session for DevTest Community Webcast

Date: Thursday, October 20, 2016

_____

-Ashutosh Satyam - 2:26 PM

Q: Do we need to register DevTest admin / Power User to APIM before we can deploy the policies to APIM?

      -Karl Miller - 2:31 PM

      A: No, but you do need a user id / password with permissions to the APIM gateway. They do not share user base.-

_____

-Ashutosh Satyam - 2:33 PM

Q: I noticed during deployment we are using a user for deployment. Where is this User managed?

      -Melanie Giuliani - 2:35 PM

      A: the users are managed under settings > users. daniel is providing more info on the screen-

_____

-Carl Karlsson - 2:34 PM

Q: This is all done between the APIM Gateway and DevTest right? No need to deploy agents to app servers?

      -Melanie Giuliani - 2:36 PM

      A: correct - we've filtered all the transactions to be routed through the gateway, and that is routing all of the tranactions onto devtest so they can be recorded. there is no agent required.-

_____

-Dwayne Culbertson - 2:35 PM

Q: Are there any security considerations to use the Continous Validation Service with test cases created using application insight

      -Koustubh Warty - 2:37 PM

      A: these test cases are regular App Test tests. -

      -Melanie Giuliani - 2:39 PM

      A: the information in the APIM integration screen is actually passed to the gateway and stored in key value pairs. the gateway controls all the security.-

_____

-prabakar.natarajank - 2:37 PM

Q: any agent required on apim tool?

   -Koustubh Warty - 2:37 PM

   A: @prabakar: no-
