CA Endevor® SCM
Customer Feedback Survey

Survey

WE WELCOME AND VALUE YOUR CONTINUED PARTICIPATION!

Our CA Endevor® Software Change Manager customers are some of the most loyal and passionate customers we have across the entire CA Technologies family. Your participation in the interactive product programs we have offered over the years is what makes this product so special. Through active and passionate involvement in Global and Regional User Groups, Community Programs, Development Programs like Development Buddy, Beta Testing and more recently Customer Validation as well as our latest interactive exchanges available through our Community portal such as Discussions, Ideas, Polls and Blogs, the partnership we have established is highly valued. The various forms of feedback you have provided help us maximize your investment with CA Technologies while raising the bar to even higher levels of quality, customer experience, satisfaction and value.

That's why I encourage you to once again let your voice be heard in a new form by completing the brief CA Endevor SCM Customer Feedback survey. Your candid response will be crucial in helping CA Technologies Executive Management understand what is or isn't working. Additionally, the CA Endevor SCM leadership team will utilize survey details to produce action plans designed to further improve the overall experience and value you receive from your investment with us.

Please click HERE to take the brief survey, which should take no more than 2-3 minutes to complete.

Once again, we sincerely thank you for your continued participation and contribution!

Be Excellent!
Best Regards,
Rose Sakach
