What's New in Quality Manager?

Community Webcast

Join us on 10/18 to hear about how CA Agile Central is investing in modern quality management with Quality Manager. You will learn how to create re-usable testing assets, gain traceability, and break down big batch testing cycles.

New Product Updates

[New Test Case Import](#): Many of you have asked to be able to import test cases and test case steps all at once, and now you can! We made some improvements to the test case import that should help making bulk test case creation simple and fast.

[Legends on Report Apps](#): For 16 apps, you now have the option to add a legend when you add these apps to a dashboard or custom page.

[Convert Story to Defect](#): Thanks to our internal hackathon, the ability to convert stories to defects is now available!
