Q&A Session for DevTest Community Webcast

Date: Thursday, February 22, 2018

_____

from John Dockendorf to host: Will the slides be provided so we can replicate the steps in our environment?

from Melanie Giuliani to John Dockendorf: Hi John - yes! The slides and recording will be posted to the DevTest community in a "webcast recap" later today

from Heloisa Flores to host: Is the sample test case available with DevTest? If not, how can we get a copy of it?

from Melanie Giuliani to Heloisa Flores: yes it is available - we will add it to the webcast recap that's posted later today

from John Dockendorf to host: Would you put the URL for the End-to-End demo in Chat?

from Melanie Giuliano to John Dockendorf: Yes – we will add the link to both the full version and the shortened version of the end-to-end demo to the webcast recap later today

from John Dockendorf to host: What version of WS and Server is needed for the demo to run?

from Melanie Giuliani to John Dockendorf: Version 9.5 is when we officially started supporting the integration, so any release after that should work

from Premalatha Gadde to host: The URL's used in the REST steps in the test case are the standard one

from Melanie Giuliani to Premalatha Gadde: yes - they should be! the Agile central team may handle the projects a bit differently, but they should all be standard
