Q&A Session for [WEBCAST] CA Spectrum® Upgrade Path - September 17, 2018
@ 10 a.m

Session number: 747267340
Date: lundi 17 septembre 2018
Starting time: 15:41

_____

ZHOU - 16:11
Q: we are currently at SS 10.2.1 on Solaris 10, what is the best way to
upgrade to 10.3 on RH 7.5?
Priority: N/A-
      -Nagesh Jaiswal - 16:12
      A: This will be migration upgrade. You will have to erect Spectrum
on RHEL box, export your data from old spectrum on Solaris and then
import to new spectrum instance.-
      -Sarbdeep Singh - 16:16
      A: As Nagesh rightly mentioned the path, you can review the link :
https://docops.ca.com/ca-spectrum/10-3-0/en/installing-and-
upgrading/upgrading/migrating-and-upgrading-ca-spectrum-
      -Sarbdeep Singh - 16:17
      A: Please follow the section "Migrate and Upgrade on Linux"-
_____

ZHOU - 16:19
Q: Thanks, will review the doc.
Priority: N/A-

_____

 -Eric Miner - 16:20
Q: Do you have a link to info about the "modeling gateway tool"?
Priority: N/A-
      -Sarbdeep Singh - 16:21
      A: https://docops.ca.com/ca-spectrum/10-3-
0/en/customizing/modeling-gateway-toolkit-
_____

 -Bryan Smith - 16:24
Q: is 10.3 a full release? as in it can be installed stand alone without
first installing 10.2 or 10.0?
Priority: N/A-
      -Sarbdeep Singh - 16:27
      A: 10.3 is a full release, can be installed on a standlone machine-
-

_____

ZHOU - 16:24
