Solution No: 27

Updated Date: 03/28/2012

Release: 14.0

Hyper: No

Problem Description Solution Downloads Dependencies Related Problems

Problem Description

TITLE: Aggregate Maintenance from 15JUN2011 to 29FEB2012

This solution is an Aggregate Maintenance file containing PTFs that have been published within the period of time specified on the solution title line.

PROBLEM DESCRIPTION:

FMID PTF DESCRIPTION

CAIE00 R030586 INITIATE INTERNAL ERROR AND VARIOUS AMODE PROBLEMS

CAIE00 R030641 DB2 - IDOFITCB MACRO CONTAINS WRONG DSRM NAME

CAIE00 R030934 WEB - \$IAB0VIE INCORRECT RESPONSES

CAIE00 R031859 CAILSAMP MISSING MEMBERS ILI4FCT, ILI4PLT, IDLM+ SOURCE

CAIE00 R032458 HELP TEXT INCORRECT

CAIE00 R034155 \$I6INTERNAL STATUS ASRA WHEN CONNECTED TO DB2

CAIE00 R035463 SOURCE TRANSPORT - IMPORT PANEL WITH FIELD LEVEL HELP PANEL

CAIE00 R035755 WEB - DIALMASK TRANSLATE ERROR

CAIE00 R036727 BATCH SORTED REPORT ABENDS

CAIE00 R037079 DYNAMIC SQL - SUPPORT PREPARE

CAIE00 R040550 RESOURCE EDITOR VERSION INCORRECT

CAIE00 R040711 POST INSTALL CONFIGURATION JOBS INCORRECT INSTRUCTIONS

CAIE00 R040944 ASYNCHRONOUS ROW ASRA WITH QUITIDAL YES

CAIE00 R034389 DB2 ROW FAILURES DUE TO ADDRESS MODE

CAIE00 R039115 DB2 ROW FAILURES DUE TO ADDRESS MODE / FMID CORRECTION

CAIE00 R040712 POST INSTALL CONFIGURATION JOBS INCORRECT INSTRUCTIONS

CAIE00 R037050 DYNAMIC SQL - SUPPORT PREPARE

This solution is not cumulative. It may be necessary to download previous Aggregate Maintenance in order to obtain a complete collection of PTFs for this release.

No action is required from CA MSM users regarding this solution.

CA Recommended Service (CA RS) for z/OS

As part of the Mainframe 2.0 strategy, CA Technologies is keeping our promise to simplify software management of z/OS by delivering CA Recommended Service (CA RS) for z/OS. CA Recommended Service for z/OS identifies PTFs that have passed additional quality validation criteria over a measured time cycle. CA RS for z/OS is patterned after IBM's preventive maintenance model, Recommended Service Upgrade (RSU), which has been widely adopted.

CA Technologies created a mainframe Integrated System Test (IST) environment for the continuous testing of published service (PTFs) for the products in the CA Technologies Mainframe Stack for z/OS. The products that comprise the CA Technologies Mainframe Stack for z/OS can be found at <http://support.ca.com/redinfo/msmprods>. All of these products have been implemented across the IST multiple system simplex. The IST environment runs all supported releases of the z/OS operating system and multiple releases of IBM subsystems (CICS, DB2, IMS) which are also maintained at the quarterly IBM RSU levels.

CA Recommended Service for z/OS is a list of ++ASSIGN statements for all regular PTFs that have been tested in the IST environment for at least 90 days and for all HIPER PTFs that have been validated for at least 30 days. A SOURCEID of CARymm is part of the ASSIGN statement. CA RS for z/OS is delivered quarterly starting in October 2010. You can review the [CA RS for z/OS Quarterly Report](#) for complete information on which PTFs are included.

[CA Mainframe Software Manager \(CA MSM\) 3.1](#) introduced automated support for CA RS for z/OS. Using [CA MSM](#), you can schedule product catalog updates to receive service (published PTFs) for the products you have licensed. You can also use CA MSM to receive the CA Technologies [ERROR HOLDDATA](#) bucket, and then apply the CA RS for z/OS level as part of your ongoing preventive maintenance cycles. Customers who have not yet adopted CA MSM can also benefit from CA RS for z/OS, though the manual processes are more time consuming.

Because CA RS for z/OS provides a new preventive maintenance methodology, service packs will no longer be delivered for the product releases in the CA Mainframe Stack. Of course, you can RECEIVE and APPLY service anytime for corrective maintenance. CA RS for z/OS provides IST-verified preventive maintenance across the entire CA Technologies Mainframe Stack, giving you a way to manage risk while keeping your CA Technologies software environment up to date.
